

Endocrinology Consultation Report

Patient: Linda Brown

Age: 64 | Female | Date: 06 Jan 2026

Concerning Results

HbA1c: 9.8% (Poorly controlled diabetes)

Fasting Blood Glucose: 212 mg/dL (High)

Random Glucose: 268 mg/dL

Blood Pressure: 142/88 mmHg

Creatinine: 1.4 mg/dL (Mildly elevated)

Urine Microalbumin: Positive

Patient shows poor glycemic control with evidence of early diabetic nephropathy. Current regimen insufficient. Recommend initiation of SGLT2 inhibitor or GLP-1 agonist, intensify insulin therapy, strict diet control, and nephrology referral. Risk of complications high if not addressed immediately.

Dr. James Liu, Endocrinologist
